

DBA: LEW'S LAKESHORE NURSERY

2022-23 PRICELIST

THE FOUNDATION FOR GROWING EXCELLENCE

Greetings to all Friends,

In agriculture, horticulture, farming, or any other industry that one could consider a family-trade, there's always the topic of "generations." When I entered the nursery industry full time, I was the third-generation of seedling propagators in my family. At the time, I was in a generational gap. I was younger than everyone I knew and worked with in the industry. I had landed in the nursery business at a time that for whatever reason, there weren't people my age. Most everyone that I worked with was a solid 10 to 30 years my senior. It wasn't until about 5-10 years later, the next wave of sons and daughters started coming into the industry. Until that point, I was a kid trying to act like I knew what I was talking about, in an adult conversation.

In one respect, it felt odd to be so young in the industry, at the helm of a company that I wasn't fully qualified to operate. On the other hand, it also gave me the opportunity to learn from some of the very best and brilliant mentors and managers of people. By the time a new wave of growers came into the industry, I was fortunate, to be able to share some of the knowledge and lessons I had learned along the way and still connect at my age. I knew solid ways to both make money, lose money, operate a nursery with a little less chaos, and a few management and leadership skills.

Mentoring and Leadership are two subjects that I both love and study. I don't claim to be more than average at either one, but I'd argue to my last breath about the importance and relevance they have in our industry and most walks of life in general. I've always loved the nursery industry, working with trees, blah, blah, blah. Working with people and seeing their personal growth and success is where I've always found my greatest satisfaction in both the nursery sector and life in general.

Whether we realize it or not, a conversation in time could be a thread, with great impact, in the fabric that makes up somebody's career. I look back at conversations with my mentors and what I took not only from specific conversations, but from observing the person they were in general over time. I studied who they were, how they respectfully interacted with people, and the level of respect and admiration they garnered naturally, unsolicited from peers. Then I would reflect on who I was, where I was in life, and who and where I wanted to be. At 46 years old, when self-evaluating and grading my personal journey; I'm somewhere between a court jester and a middle-aged wise elf. I have a long ways to go.

With our son Trystan coming on as the 4th generation of Lewis tree growers this next fall, to my absolute delight I'm already noticing him gravitate towards mentors and leaders. What we can teach and pass on to the current and future generations is so vital to the continuity of our lives, community and industry. I always encourage mentoring our youth and sharing leadership skills.

As always, thank you for the continual support of our nursery business and family. We wish everyone a year of good health, happiness, and prosperity.

-John Lewis and The Lewis Family

BAND POT GROWN SEEDLINGS

JLPN got started growing seedlings in Band Pots over 20 years ago. Today Band Grown seedlings account for half of our production. Seedlings grown in our custom soil will establish quickly on transplant, do not need to be transplanted into a larger container if you are grafting, and BAND POT GROWN SEEDLINGS HAVE EXCEPTIONAL ROOTS.

B-Grade Seedlings

This year JLPN

is offering B-Grade field grown seedlings for land reclamation and reforestation productions. These plants are all viable and healthy, but do not adhere to guidelines of the ANLA standards for tree grades and suitability for the landscape (primarily the roots). They are a viable tree with a root and a top, that will survive if watered and handled properly.

B-Grades will HAVE:

- A viable root and top, meaning it will survive and grow
- A general grade for height or caliper, not both, and not exact
- Potentially forked or broken tops
- A root that could be J'd, forked, crooked, or Curly-Q'd
- A strong resemblance to the Charlie Brown Christmas Tree Pre-decoration
- To be ordered in quantities of 5,000 or more

B-Grades will possibly NOT:

- Meet ANLA standards
- Have root systems suitable for nursery landscape and retail market
- Have straight roots
- Have perfect leaders
- Have a chance of turning into the wonderful version Charlie Brown Christmas tree when it's all pretty and decorated
- Be sold in quantities less than 5,000

B-Grade Acer rubrum

ROOTED CUTTING DESCRIPTION

JLPN sells many items by the piece, and not by size, due to the fact that the development of the root system is far more critical to a plants future growth than the height. To clarify the scale, we have provided the following pictures of 25 count, rooted cutting bundles. In all cases, JLPN delivers plants that are healthy and viable, however having two options gives the buyer a little flexibility on price, to fit their growing needs.

0" Rooted Cutting (R/C)

Not Advertised for Sale, zero's are just that, zero new growth. They are fully rooted, but only suitable for containers.

1"- 3" Rooted Cutting (R/C)

1-3" of new growth, and fully rooted. Recommended for growing in container for 1 season, or fields with solid weed control practices.

4"+ Rooted Cutting (R/C)

4"+ of new growth, and fully rooted. All R/C's are topped at a max height of 16". Roots are going to be larger, more durable, and more developed. All plants listed "R/C" are field ready, for transplanting.
