THE FOUNDATION FOR GROWING EXCELLENCE

Front cover: Marley's Pink
Above: Ginkgo biloba
All photos by John Lewis

The Lewis Family: Crystal, Marley, Trystan and John

Greetings to all friends,

You know that feeling you get when you go to do a task, and you realize that something has gone awry, but you won't fully know what, until you look behind door #3? Case in point, when you walk up to the kitchen sink, and notice that you're standing in water. That's about the time my wife asks, "Should we call somebody?" Then from out of nowhere, a door thunders open, mysterious fog billows out, and with glowing back-lighting, I walk out with pipe wrench in hand, and say with absolute confidence, "No honey... I can fix that!" Oh, the look of true fear in her eyes...

About the time, I have everything torn apart, made several trips to the supply store, and made a total mess of something that once upon a time, had a simple solution, the reality fairy tosses me a few nuggets of wisdom: 1. There are professionals that specialize in this field, and I can pay for their services. 2. By the time I'm finished, have I done as good of a job, and saved money? 3. I'm not a plumber, why don't I outsource this?

This past several years, labor and resources have become more and more critical in our industry like never before. The lack of labor resources has inspired and driven change, both through adaptation, or force. JLPN has always tried to automate, but until 2014, had only scratched the surface. Automation was the only way we could still increase production to meet increasing demands, but also maintain a profit margin, while decreasing our reliance on the limited labor pool. Outsourcing overhead, such as leaving seed collection and mechanical fabrication to the professionals, has saved us time and resources, so we could focus on what's truly making us money; our propagation.

Many of our current and new customers have found that outsourcing their propagation needs to JLPN is an effective way of freeing up limited labor resources in their own production. When labor was cheaper, and more plentiful, it financially made sense to do some propagation in-house to save a little money. But labor is not cheap or plentiful in today's market, and most shade tree growers are not set up to automate a small propagation production. In-house propagation is becoming less of a savings, and more of a drain on resources, a production headache and takes time away from maintaining focus on the crop that truly creates income. Outsource your overhead, and outsource your headaches to JLPN.

Much like a plumber, or mechanic, who has the tools to do the job right, and make money doing it, I don't. It's just a headache, an inefficient use of my time and it's so much easier to just make a call, and not have to worry about it. JLPN can take care of your propagation needs with a phone call.

It's been an exciting year to see the turn-around in the market for growers. No doubt we owe many thanks to our customers for continual support of our nursery family, and look forward to many more prosperous years.

Paperbark Maple

Acer buergerianum

Trident Maple zone 5

Native to Japan, Trident Maple is widely known for its use in bonsai due to the leaves keeping good reductive form. Mature specimens add very attractive shape and color to landscapes with its orange tinged exfoliating scaled bark and vibrant yellow, orange and red fall color. Height 30'-35'

Per Bundle

25

ABP

OUTSOURCE YOUR OVERHEAD

“John [Lewis] and JLPN desires to produce the highest quality seedlings and liners, and based on my visits and experiences with his plants, he succeeds at the highest level,” says Dr. Michael Dirr, horticulturist, retired professor of horticulture, plant breeder and author. “I’ve observed beds of red maple, American beech, Nyssa, sweetgum, nuttall and swamp white oaks that were almost too uniform to be seedlings, yet they were. It’s one of the neatest nurseries I have visited, and weeds were in absentia.”

—Mike Dirr

JLPN only collects seed, in the case that we can’t outsource it, because collecting it ourselves doesn’t save us money, and creates a drain on vital resources (labor). Our money is made in our propagation, and our margin comes from the large amount of mechanical automation that we’ve outsourced and installed in the recent past. This is why every nursery should consider “Outsourcing Your Overhead” to JLPN.

Labor was cheap and plentiful in the past, but those days are gone. Many of our customers who used to do in-house propagation, realized that it was a misuse of vital resources (The work-crew), working in propagation to save pennies, while their field crop, which yielded dollars, lie in wait for care and maintenance. The true money making portion of the business took a back seat while resources were used to do cuttings and seedlings.

JLPN is set up to propagate and produce material efficiently, because that’s where our dollars are made. By “Outsourcing Your Overhead” (Propagation) to JLPN, production can be focused on the crop that creates true revenue in your business. Call, Order, and Receive, and reduce headaches of production, eliminate wasted by-product, and ease labor constraints in one simple action. Please call me, for more information on how JLPN can implement efficiency into your program.

Quercus muehlenbergii

25

Chinkapin Oak zone 3-9

Chinkapin is distinctive from other oak varieties with its 4-8" long oval leaves, and showy yellow fall color. Recommended for buffer strips and reclamation, this will transplant easy with our excellent root system. Height 70'

ABP

EACH
\$1.60

Quercus nuttallii

25

Nuttall Oak zone 6

Nuttall oak is one of the more distinctive oaks in the landscape with strong showy red fall color and widely adaptable to urban growth sites. ABP* Height 60' x 35'

ABP

EACH
\$1.50

Quercus palustris

25

Pin Oak zone 4-8

Pin oak has excellent bronze orange fall color and grows best in high acid soils but does not like high pH. These seedlings have root fiber production unmatched by other growing containers. Height 55'-75'

ABP

EACH
\$1.50

Quercus phellos

25

Willow Oak zone 5

Willow Oak has dark green glossy leaves and orange-red fall color. Although known to be difficult to transplant, being grown in our custom soil blend in the Anderson Band Pot greatly increases transplant success. Height 40' x 30'

ABP

EACH
\$1.60

Quercus prinus

25

Chestnut Oak zone 4

Common to the Appalachian mountain range, chestnut oak acorns are said to be relished by wildlife. The bark at maturity is similar to the scale on an alligator back. Yellow-orange fall color. Height 80'

ABP

EACH
\$1.60

Quercus robur

25

English Oak zone 4

English oak is adaptable to a wide range of soil types and variable pH. It's relatively pest resistant, other than mildew. This is a fast growing and durable oak that works well as an understock for budding and grafting. Broadly columnar. Height 50-60'

ABP

SALES AND CREDIT TERMS AND CONDITIONS

Downloadable applications available online at www.jlpliners.com

JLPN Inc.

Policies and Terms Control.

Applicant/Buyer acknowledges that any and all sales on and extensions of credit by JLPN Inc., are expressly conditioned upon buyers unconditional acceptance of JLPN Inc. Sales and Credit Terms and Conditions stated herein and as hereafter amended. JLPN Inc. Sales and Credit Terms and Conditions supersede any and all terms and conditions appearing on Buyer's documents, including but not limited to purchase orders regardless of the time presented.

Authorization to Obtain Information.

Applicant/Buyer grants to JLPN Inc. the continuing right to obtain credit reports involving the Applicant/Buyer or other financial and credit information and to investigate the Applicant/Buyer's financial status from time to time as JLPN Inc. may see fit. Applicant/Buyer shall sign a written authorization to obtain information in a form acceptable to JLPN Inc. on request.

Change of Ownership/Address.

Applicant/Buyer, shall promptly advise JLPN Inc. in writing of any change of ownership of or the address of Applicants/Buyer's business. All such notifications shall be made to JLPN Inc., in writing, within five (5) working days of the change.

Guarantee.

JLPN Inc. guarantees all stock for grade ordered, named variety and good condition up to delivery to the freight carrier. Condition, growth, and production after delivery to the freight carrier is the responsibility of the Buyer.

Force Majeure.

If performance is made commercially impracticable or impossible because of the occurrence of an event beyond the reasonable control of JLPN Inc., including but not limited to, weather, acts of God, war, labor disputes, etc., then JLPN Inc. shall not be responsible for its inability to fulfill any orders in whole or part.

Ordering Terms.

A Twenty-five percent (25%) deposit is required on all customer orders. Those with approved credit have thirty (30) days from the shipping date to pay the balance in full. **New customers must arrange pre-payment or COD prior to JLPN Inc. shipping the order.**

Payment.

Payments made with credit cards, please note there is a 2.75% surcharge. All balances must be paid in full within thirty (30) days of shipping date. Invoices are sent within seven (7) business days of shipping and include shipping date and shipping cost.

A late charge of 2 percent per month (24% per Annum) on the unpaid balance will be added to all accounts past due. Failure to adhere to these terms may result in a shipping hold on all unshipped orders and/or a termination or reduction in the credit JLPN Inc. will extend. All payments are to be made to:

JLPN Inc.

1118 Lancaster Drive NE #409
Salem, Oregon 97301

Cancellation.

All cancellations must be made to JLPN Inc. by the 1st of Dec. of each season. Any cancellation past that date may result in a cancellation of the balance of the Buyer's order and/or forfeiture of the Buyer's deposit. Phone will be the only acceptable method.

Packing/Shipment.

Cost of packing and shipping is in addition to the price of stock and will be added to the Buyer's balance upon shipping.

Confirmation.

All orders will be confirmed in writing by JLPN Inc. before shipping. The written confirmation shall include payment terms and estimated shipping date.

Delivery.

JLPN Inc. makes no guarantee with respect to delivery. JLPN Inc. will ship FOB JLPN Inc. loading dock via UPS unless another carrier is specified by the Buyer before confirmation. Shipping is at risk of the Buyer and JLPN Inc.'s responsibility for all stock ceases upon delivery to the carrier. If stock is damaged in transit, Buyer must make all claims to the freight carrier, not to JLPN Inc.

Claims.

All claims must be reported by Buyer to JLPN Inc. within ten (10) days of the receipt of the shipment. Adjustments, if any, will only be for claims concerning the quality of grade, named variety, or damage from JLPN Inc. harvesting. **All plants become Buyers property upon delivery to the freight carrier. All unsatisfactory stock**

must be returned to and received by JLPN Inc. within fourteen (14) days of delivery to Buyer. Re-shipment must be authorized in writing by JLPN Inc. and plants must be returned in good condition. Freight on return of unsatisfactory stock will be paid by JLPN Inc., once approved by JLPN Inc. for return.

Attorney Fees.

In the event Buyer's account with JLPN Inc. is placed in the hands of an attorney for collection, Buyer promises and agrees to pay JLPN Inc. reasonable attorney's fees and costs, even though no arbitration, suit or action is filed thereon. Further, if any arbitration, suit, or action is filed to collect any sums allegedly due by Buyer to JLPN Inc. Buyer promises and agrees to pay JLPN Inc. reasonable attorney fees and costs as fixed by the arbitrator, Court or Courts in which the arbitration, suit or action, including any appeal therein, is tried, heard or decided.

Oregon Law.

All transactions between Buyer and JLPN Inc. shall be interpreted under the laws of the state of Oregon. Further, Buyer stipulates to jurisdiction and venue in Marion County, Oregon for any claims arising out of any transaction between Buyer and JLPN Inc.

Applicant, by submitting this application, represents and warrants to JLPN Inc. that all information contained in its credit application is true and correct and authorizes JLPN Inc. to investigate any and all references listed herein and to obtain a consumer credit report upon Applicant for use in evaluating this application.

The terms Buyer and/or Applicant mean the person/entity submitting this application.

SIGNATURE

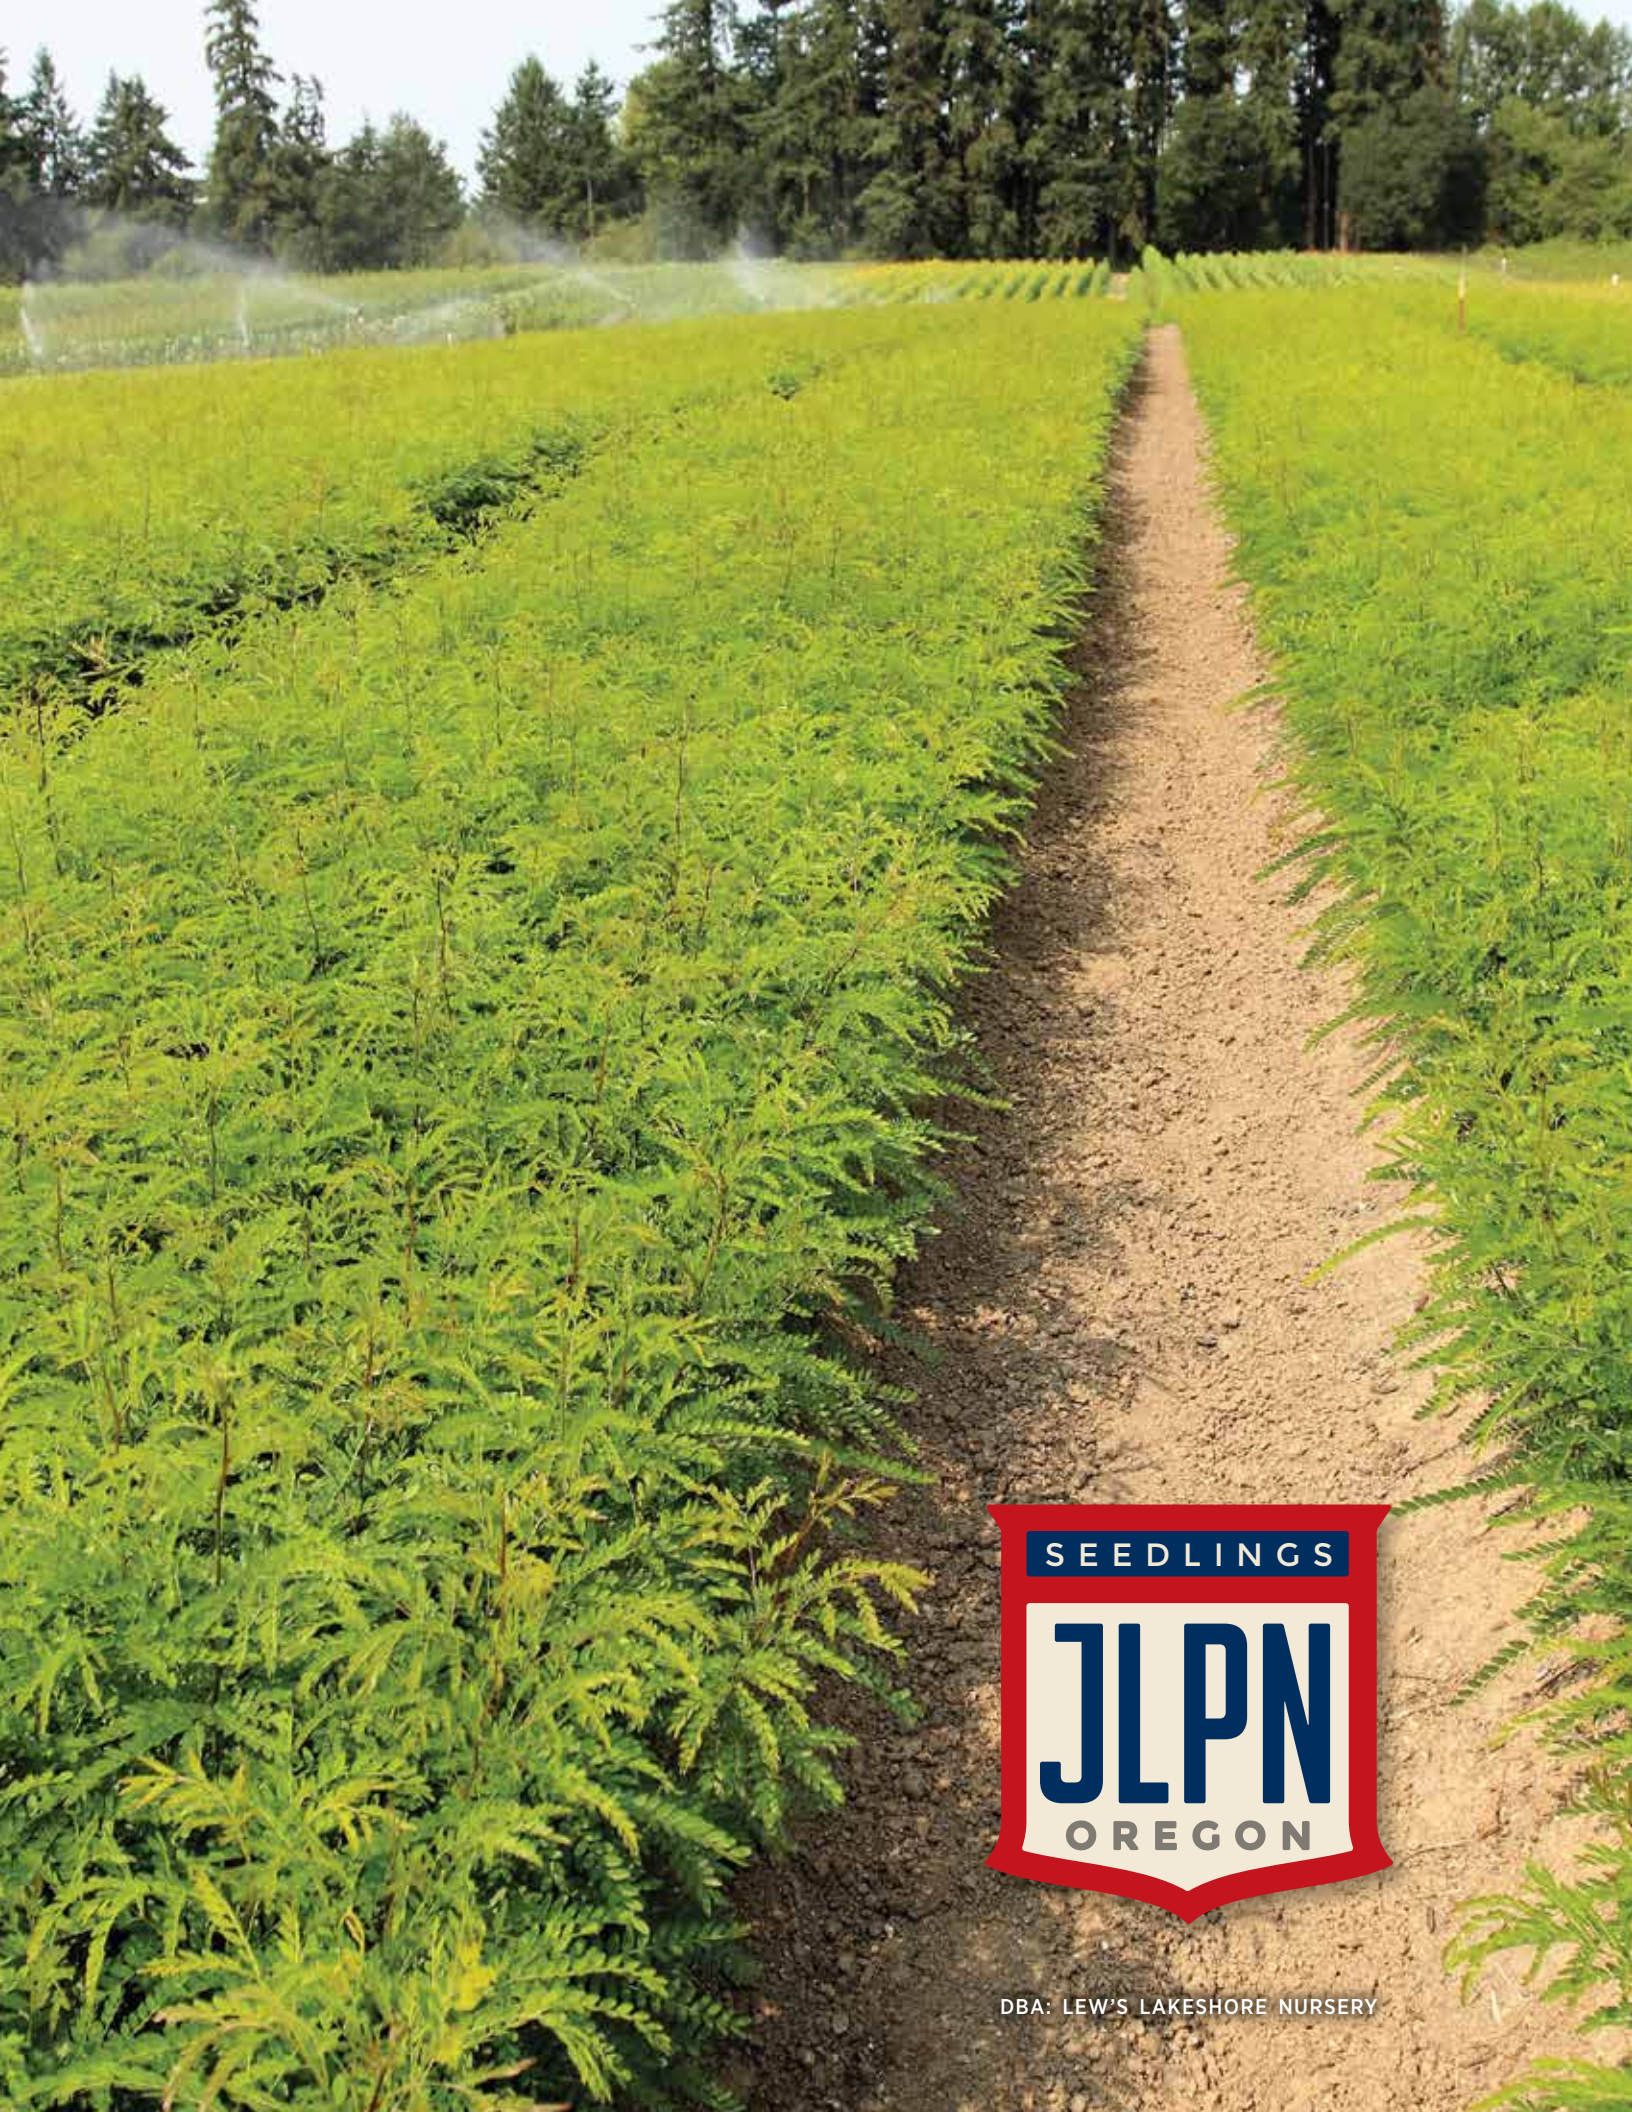

DATE

In a somewhat frequent manner, I ask the kids if they've thought about what they want to be when they grow up. As every parent knows, this changes over time. As of now we will have a future baker, and a future nurseryman, but only time will tell. Watching our kids grow year after year with confidence, charisma, and kindness is by far the most gratifying accomplishment my wife and I have achieved. The future is big and full of unknowns, but the excitement of who and what they become is a thrill in itself.

— John Lewis

DBA: LEW'S LAKESHORE NURSERY
