

2023-24 PRICELIST

THE FOUNDATION FOR GROWING EXCELLENCE

Dear Valued Customers,

This past year marked another successful year for JLPN and we couldn't have done it without the continual support of our loyal customers, so thank you from all of our JLPN Family.

Every year that we complete another crop cycle, it amazes me to think back on a year and reflect on the elements that were completely different from every other year.

In spring of 2022, we experienced one of the coldest and wet springs on record. We generally start our rooted cutting production at the end of May, however last year, we didn't start until June 21st, which set us back a full month of growth. This weather created many challenges getting a one-year crop to make up in size. On several product lines, some varieties didn't make grade, which negatively impacted sales. Fortunately, this growing season, our weather is warm and on track for an exceptionally nice crop.

Last summer, Sean Offield joined our team in Sales and Business Development. His role has been critical in developing and growing JLPN both operationally and financially through analyzing our profit, loss and overhead. In the fall, our son Trystan joined the JLPN team full time, officially making us a 4th generation nursery. Both individuals are of the die-hard JLPN mindset and are great additions to our team and the future succession of JLPN.

The JLPN Lean program is going on 8 years, creating value-added products for our customers in a more efficient manner with less waste. Last year, we saw the biggest gains and progress in our production and personnel development. Building a Lean program in your nursery takes enormous consistency and effort, but it's exceedingly rewarding operationally and financially. Our JLPN crews look at loss in the form of little numbers becoming big numbers, that ultimately affect the financial health of the company at the end of the year. The reward of progress and seeing your individuals develop is massive.

As a weathervane to the tree market, JLPN is constantly watching this ever-evolving beast, that we as growers are continually trying to tame. With another season coming on, we have seen steady and predictable sales in shade, flowering and ornamental. As growers, we need to always remember '2008 and the disaster when massive drops in demand meet over-production. Our customers and growers across the U.S. have expressed a strong market with solid sales. We hope the trend continues without pause.

For good luck in fishing they say, "Tight Lines." In game shows they say, "No whammies." In the nursery business we say, "Small burn pile!" If we can all keep production volumes tight and burn piles small, it will contribute to higher margins overall.

I want to express gratitude from my staff and family to all the growers that have been reliable and consistent with JLPN over the past years, we wouldn't be here without your strong support. Have a great season, we look forward to hearing from you.

-John Lewis and The Lewis Family

BAND POT GROWN SEEDLINGS

JLPN got started growing seedlings in Band Pots over 20 years ago. Today Band Grown seedlings account for half of our production. Seedlings grown in our custom soil will establish quickly on transplant, do not need to be transplanted into a larger container if you are grafting, and BAND POT GROWN SEEDLINGS HAVE EXCEPTIONAL ROOTS.

B-Grade Seedlings

This year JLPN

is offering B-Grade field grown seedlings for land reclamation and reforestation productions. These plants are all viable and healthy, but do not adhere to guidelines of the ANLA standards for tree grades and suitability for the landscape (primarily the roots). They are a viable tree with a root and a top, that will survive if watered and handled properly.

B-Grades will HAVE:

- A viable root and top, meaning it will survive and grow
- A general grade for height or caliper, not both, and not exact
- Potentially forked or broken tops
- A root that could be J'd, forked, crooked, or Curly-Q'd
- A strong resemblance to the Charlie Brown Christmas Tree Pre-decoration
- To be ordered in quantities of 5,000 or more

B-Grades will possibly NOT:

- Meet ANLA standards
- Have root systems suitable for nursery landscape and retail market
- Have straight roots
- Have perfect leaders
- Have a chance of turning into the wonderful version Charlie Brown Christmas tree when it's all pretty and decorated
- Be sold in quantities less than 5,000

ROOTED CUTTING DESCRIPTION

JLPN sells many items by the piece, and not by size, due to the fact that the development of the root system is far more critical to a plants future growth than the height. To clarify the scale, we have provided the following pictures of 25 count, rooted cutting bundles. In all cases, JLPN delivers plants that are healthy and viable, however having two options gives the buyer a little flexibility on price, to fit their growing needs.

0" Rooted Cutting (R/C)

Not Advertised for Sale, zero's are just that, zero new growth. They are fully rooted, but only suitable for containers.

1"- 3" Rooted Cutting (R/C)

1-3" of new growth, and fully rooted. Recommended for growing in container for 1 season, or fields with solid weed control practices.

4"+ Rooted Cutting (R/C)

4"+ of new growth, and fully rooted. All R/C's are topped at a max height of 16". Roots are going to be larger, more durable, and more developed. All plants listed "R/C" are field ready, for transplanting.
