

### **2025–26 PRICELIST** THE FOUNDATION FOR GROWING EXCELLENCE

Growing Beyond Boundaries: JLPN's Next Chapter

For four generations, JLPN has proudly evolved into a reliable industry leader in providing exceptional deciduous field-grown seedlings, container-grown seedlings, and rooted cuttings. Like a mature oak that continues to develop new branches, our company has always understood that growth is not just a principle we apply to our products—it's the foundation of our business philosophy.

Your needs and feedback have always guided our path forward. That's why we're excited to announce our evolution into grafted trees, tissue culture liners, and conifers. This expansion represents not just new product lines, but our commitment to growing alongside you and anticipating the future needs of the industry. We would like to hear about the varieties you are needing a consistent supply on.

In this modern horticultural landscape, we find ourselves much like smartphone users navigating constant updates—just when you've mastered one system, there's something new and improved on the horizon! The difference is, while technology often leaves us scratching our heads, our evolutionary steps are designed with clarity and purpose, ensuring you're never left behind as we advance together.

Our annual investments in automation reflects this forward-thinking approach and this year, JLPN will hold pricing on container seedlings and rooted cuttings. By embracing innovative technologies throughout our growing and processing systems, we're enhancing consistency, quality, and efficiency—allowing us to focus our expertise where it matters most: developing the exceptional plant material you've come to expect from JLPN. This provides a product that our customers will make more profit on as the trees survive and thrive

None of this growth would be possible without your continued trust and partnership. We're deeply grateful for your business through the years and for challenging us to reach new heights. As we branch out into these exciting new territories, we remain rooted in the same values of quality, integrity, and service that have defined JLPN for generations.

Our family appreciates and wants to extend our deepest gratitude for the growers who rely on us to deliver every year, giving us an opportunity to show our appreciation through value added products and

service.

Here's to growing together,

John L. Lewis

## Premium Conifers Grown in Plug Cells

**JLPN** started growing premium conifer seedling plugs to create wins for our customers. These contained-cell-grown conifer liners will eliminate the death loss and transplant shock issues growers face with bareroot conifer seedling liners. Our goal is to provide the best quality, in-demand conifer species in volume. If there is a variety you are interested in not on our list, reach out to us and let us know what you are looking for. Take a look at our current conifer listings and please let us know if you have any questions. We are excited to get this new product line into your hands.

# B-Grade Seedings

#### This year JLPN

is offering B-Grade field grown seedlings for land reclamation and reforestation productions. These plants are all viable and healthy, but do not adhere to guidelines of the ANLA standards for tree grades and suitability for the landscape (primarily the roots). They are a viable tree with a root and a top, that will survive if watered and handled properly.

#### **B-Grades will HAVE:**

- A viable root and top, meaning it will survive and grow
- A general grade for height or caliper, not both, and not exact
- Potentially forked or broken tops
- A root that could be J'd, forked, crooked, or Curly-Q'd
- A strong resemblance to the Charlie Brown Christmas Tree Pre-decoration
- To be ordered in quantities of 5,000 or more

#### **B-Grades will possibly NOT:**

- Meet ANLA standards
- Have root systems suitable for nursery landscape and retail market
- Have straight roots
- Have perfect leaders
- Have a chance of turning into the wonderful version Charlie Brown Christmas tree when it's all pretty and decorated
- Be sold in quantities less than 5,000

**JLPN** sells many items by the piece, and not by size, due to the fact that the development of the root system is far more critical to a plants future growth than the height. To clarify the scale, we have provided the following pictures of 25 count, rooted cutting bundles. In all cases, JLPN delivers plants that are healthy and viable, however having two options gives the buyer a little flexibility on price, to fit their growing needs.

1"-3" Rooted Cutting (R/C)

#### O" Rooted Cutting (R/C)

**Not Advertised for Sale**, zero's are just that, zero new growth. They are fully rooted, but only suitable for containers.

**1-3" of new growth**, and fully rooted. Recommended for growing in container for 1 season, or fields with solid weed control practices.

4"+ Rooted Cutting (R/C)

**4"+ of new growth**, and fully rooted. All R/C's are topped at a max height of 16". Roots are going to be larger, more durable, and more developed. All plants listed "R/C" are field ready, for transplanting.

# Plugs, Cells and Bands

In our past conversations with growers, we collectively identified a need and demand for a product that has a lower entry level price. The robust root system and top growth of a band pot wasn't always a necessity for some growers to achieve their end product on various levels. To answer this need, JLPN started trialing plug and cell grown products these past couple years. We are currently trialing 32 count Redi-Root (air-pruning pot) for deciduous seedlings and Tissue Culture liners and 50 count plugs for conifers. In many products, we utilize Grow-coon container liners, to ensure no loss of soil on the roots, creating 98-100% transplant success. Please let us know if there are products that we currently grow or can grow, in another format, aside from Band Pot grown seedlings.

| Latin Name             | Common Name             | 1-499  | 500+   |
|------------------------|-------------------------|--------|--------|
| Acer saccharum (Sugar) | Sugar Maple             | \$1.65 | \$1.35 |
| Cedrus deodara         | Himalayan Cedar         | \$0.90 | \$0.75 |
| Cercis canadensis      | Eastern Redbud          | \$1.65 | \$1.35 |
| Diospyros virginiana   | American Persimmon      | \$2.40 | \$2.10 |
| Picea abies            | Norway Spruce           | \$0.90 | \$0.75 |
| Pinus heldreichii      | Bosnian Pine            | \$0.90 | \$0.75 |
| Pinus nigra            | Austrian Pine           | \$0.90 | \$0.75 |
| Pinus strobiformis     | Southwestern White Pine | \$0.90 | \$0.75 |
| Pinus sylvestris       | Scotch Pine             | \$0.90 | \$0.75 |
| Taxodium distichum     | Bald Cypress            | \$1.88 | \$1.66 |

As **JLPN** continues to evolve our product listings, we are now producing tissue culture liners in 32 count Redi-Root cell trays. Many of our growers have requested T/C liners, due to not have the facilities to acclimate and grow T/C on from Stage 3. We are producing these liners for growers in need of custom grown orders and we are producing some additional plants for open availability. If there's a TC product (not necessarily trees) you are needing, but can't find a consistent source, please contact us.

| Latin Name                                       | Common Name                       | 1-499  | 500+   | Royalty |

For 20+ years, customers have asked for or requested for JLPN to produce grafted liners. While we never plan on competing with our grafting clientele, we've recognized a strong uptick in market demand for consistent quality coupled with reliable supply. We are just getting started, but JLPN has the capability to expand as our growers' request, through custom orders.

We are producing 1-gallon liners, nothing larger. Please contact us and let us know what varieties you are having challenges on quality, reliable supply.

### Automation at JLPN

Since '2013 JLPN has aggressively pursued automation with the initial addition of our Wurdinger Planting line. In 2023, we added an Urbinati seeding line to increase our germination rates, and space-use efficiency in the greenhouse. This year we acquired a TTA tree seedling transplanter. This new addition will increase the speed and precision transplanting of our products from cell tray and ellepots germinated seeds, to plug-grown, and band pot grown seedlings. While we can't use this robot for all products, it's a huge leap forward in creating value added product and efficiency at JLPN.
